

BHESCO

Clean Energy For People Not For Profit

Renewable Energy Project Developer

Full-time or Part-time. Brighton, East Sussex.

Salary range: £25,000 - £28,000 (pro rata) depending on experience

Are you passionate about using your engineering knowledge and skills to address our climate emergency? We are a Brighton-based renewable energy co-operative, gaining national recognition for the innovative work we are doing with cutting-edge technology and community energy ownership structures.

We are looking for an enthusiastic engineer or engineering graduate to help us develop our residential and commercial projects.

The role involves:

- Understanding the specifications and capabilities of existing and new renewable technologies and applying them appropriately to new projects.
- Performing complex economic and environmental modelling to determine the feasibility of proposed projects using our templates.
- Project management of BHESCO's portfolio of projects: Obtaining quotes from contractors, keeping track of progress of several projects at once using project management software.
- Following-up with contractors and other stakeholders to ensure the projects are moving according to schedule.
- Monitoring and recording the performance of our portfolio of operating solar PV systems.
- Providing project development support including consideration of all existing technologies that would be relevant to the customer.
- Reporting progress and outcomes to BHESCO's CEO.

Person specification:

Essential

- Engineering degree – mechanical engineer preferred.
- Sound knowledge of renewable heat and electricity systems.
- Advanced Microsoft Excel skills.
- Highly organised and able to keep track of several projects simultaneously.

- Commitment to the environmental cause is essential. BHESCo is staffed by a small team who are passionate about addressing climate change and leading the way in community energy. We are a young organisation which is gaining national recognition. You will have a strong desire to be a part of BHESCo's success and drive its growth.

Nice to have:

- Personable and professional - at ease dealing with contractors and customers alike.
- Able to build long-term working bonds with colleagues, contractors and customers through a pro-active and helpful approach.
- The successful candidate will be committed to making an impact on addressing the climate emergency and, as a result, be able to drive existing projects to completion as well as recognise the potential for new projects.
- Excellent communication skills, both written and verbal. Able to express themselves clearly and succinctly and to adapt their communication style to suit the situation.

BHESCo has a pipeline of exciting projects which encompass a wide variety of renewable energy technologies and cutting-edge innovation. In return for your commitment to the role, we will provide training in performing the complex financial calculations behind these projects. Working for BHESCo gives you access to the practical application of technologies which are the future in combatting climate change. You will be limited only by your imagination in finding practical solutions to transforming our energy supply.

Talk to us:

If you would like to talk to us before applying for the role, please contact CEO, Kayla Ente by phone on 01273 284471 or via email at kayla@bhesco.co.uk.

How to apply:

Please email diane@bhesco.co.uk with your CV and a brief covering letter telling us why you are a great fit for the role.

BHESCo is an Equal Opportunities employer. All applicants must have an appropriate visa to work in the UK.
