- Provide 8700 jobs
- Save 2.5 million tonnes CO₂ per year
- Add £1.8 billion to the economy per year

Advantages

Trust & transparency

Expertise & experience

Local job creation

Community buy-in

Support local economy

Value for money

Heat as a Service

Benefits

Customer pays a kWh price, for heat on monthly basis

May include thermal efficiency upgrades in the monthly charge or finance separately

Bespoke solutions provided to meet individual property characteristics and consumer behaviour

Heat as a Service

Challenges

Renewable heating system matches or exceeds fossil fuel powered system

Optimum solution will differ depending on property type and local environment

Install must be quick and convenient. People will not accept no heating/ hot water for long timeframes
